

The San Francisco Bay Area Program Series for Environmental Professionals

NOVEMBER 2007 PROGRAM

Association of Environmental Professionals

Water Supply Assessments

SB 610 and SB 221 – When are they required? How do they affect a project?

Please join the Bay Area Chapter of the Association of Environmental Professionals for a timely and relevant presentation on “Water Supply Assessments”. This is a free event open to AEP, NAEP, and co-sponsoring organization members and their invited guests and includes a complimentary buffet dinner. This program is co-sponsored by the Northern Section, California Chapter of the American Planning Association.

WHEN: Wednesday, November 14, 2007, 6:30 P.M.

WHERE: Cotati Room (Behind City Hall)
216 East School Street, Cotati, CA
From 101: exit Cotati/West Sierra Avenue

WHO: **Joseph Zilles**, P.G., works with Kleinfelder’s Groundwater Services Group for water resource projects. Within the scope of the water resource engineering services, Mr. Zilles aids in pre-construction permitting (local and State), conducting well pumping tests, aquifer analysis (Water Supply Assessments, SB 610/221), and water quality investigations.

Mary Grace Pawson, P.E., is a registered civil engineer and senior project manager with Winzler & Kelly where her practice focuses on planning and financing strategies for public agencies.

WHAT: **Mr. Zilles’ presentation:**

- SB 610/221 WSA background
- What are these bills?
- Whom do the WSAs apply to?
- What must the water supplier do to meet SB 610/221 basic criteria?

Ms. Pawson’s presentation:

- How are WSAs incorporated into CEQA documents?
- How to tier from an Urban Water Management Plan (UWMP) for a WSA?
- Land Use decisions considering UWMP and WSAs.

SPACE IS LIMITED. PLEASE RSVP BY Nov. 5th TO:
Joni Goshorn, North bay Programs Team Leader
Joni.goshorn@cajaeir.com
