

A Look Ahead at California's *Clean Energy Future*

The many statewide agencies responsible for regulating and planning energy use — including the California EPA, California Air Resources Board and California Energy Commission — have recognized they cannot reach California's ambitious clean energy goals without identifying their policy interdependencies and improving cooperation. A new jointly issued report, *California's Clean Energy Future*, will guide the next decade of coordinated strategic planning, bringing cleaner energy sources online, supporting reinvigorated efforts to improve energy efficiency, developing new transmission infrastructure and ensuring the stability of the electrical grid.

Join us for a lively discussion concerning the strengths and weaknesses of the plan, as well as what it means for future renewable energy development in California.

When: Tuesday, January 25, 2011
6 pm to 8 pm

Where: SPUR's Urban Center
654 Mission Street, San Francisco, CA 94105

Cost: Free to AEP/SPUR and only \$10 for non-members
AICP credits pending

Complimentary taco bar and beverages will be served!

Who: **Panama Bartholomy** is the Deputy Director for the Efficiency and Renewables Division at the California Energy Commission. Panama has spent the last four years as an advisor for Chairmen Douglas and Pfannenstiel where he led efforts for his Commissioners on the Recovery Act, clean energy workforce development, land use, renewable energy and green building efforts.

Emma Wendt is a Sr. Analyst in the Emerging Clean Technologies team of Energy Procurement at Pacific Gas & Electric. She supports commercialization of new renewable electricity generation technologies, specifically carbon capture and storage and biomass. Emma also develops communications on PG&E's renewable energy activities.
