

**Senior Air Quality/Climate Change Specialist
LSA Associates, Inc.
Berkeley/Fresno**

LSA seeks a Senior Air Quality/Climate Change Specialist with 3+ years of professional experience, and a BS/BA in an engineering, science, environmental or urban planning field for its Berkeley or Fresno office. Excellent writing, presentation, interpersonal, and time management skills required, in addition to an active interest in planning issues and environmental review. The successful candidate will conduct and supervise air quality and/or climate change modeling and field studies; conduct research; and prepare environmental assessments/documents and technical studies. Ability to communicate with clients is key, as is a demonstrated interest in business development and ability to prepare a scope of work and cost estimate.

Knowledge of the following is desired:

- Basic air quality principles, analysis methodologies and regulatory guidelines;
- Working knowledge of air quality models including URBEMIS, EMFAC and Caline4 (ability to conduct dispersion analysis is a plus);
- AQMD and APCD regulatory programs and their CEQA Guidelines and assessment requirements;
- Methodologies related to Climate Change analysis and greenhouse gas quantification (e.g., BAAQMD's BGM model, ICLEI's CACP software, Local Government Operations Protocol).

Specific experience with the following is also desired:

- Development of greenhouse gas inventories for local governments;
- Participation in Climate Action Plan preparation for local governments including the identification and analysis of greenhouse gas emission reduction measures.

At LSA, our greatest asset is our employee ownership. We offer excellent compensation and benefits, including competitive pay; medical, dental, vision, group life, long term care, and long-term disability insurance plans; vacation, sick, and holiday pay; an Employee Stock Ownership Plan; and a Profit Sharing and Savings Plan (with 401k and company match). LSA is an EOE/AA.
