

SMART GROWTH IN THE MONTEREY BAY AREA

On the evening of September 24th, the Monterey Bay Area Chapter of the Association of Environmental Professionals is pleased to host Mr. Gary Patton at our quarterly buffet dinner presentation. Mr. Patton's presentation is entitled "Smart Growth and the Monterey Bay Region in a Time of Climate Change" and will address key coastal growth management challenges and solutions.

The Association of Environmental Professionals is a national and statewide organization with members from diverse disciplines engaged in environmental planning, analysis and management. The Monterey Bay Area Chapter serves the counties of Monterey, Santa Cruz and San Benito and is devoted to the continued improvement of environmental professions and regional decision-making.

Gary Patton is General Counsel for the Planning and Conservation League, previously holding the title of Executive Director of that organization and the PCL Foundation. Prior to this work, Mr. Patton was the Executive Director of LandWatch in Monterey County. Mr. Patton also served on the Santa Cruz County Board of Supervisors from 1975 to 1995, championing key growth management measures that continue to shape the character of our central coast communities.

With degrees from both Stanford University and Stanford Law School, he is a noted speaker and author on environmental issues affecting California. You can hear him every weekday morning doing the "Land Use Report" on KUSP during National Public Radio's "Morning Edition".

9/24/08

6:00 PM
