COST: FREE

There is a limit of **40 people so this is a FIRST COME, FIRST SERVE program. As such, registration will be cut off as soon as all spaces are filled so please register early.*

WHY: *As Richard Moe, President of the National Trust for Historic Preservation said recently in a speech on finding common ground between historic preservation and green building, "The fact is, preservationists are not gate-crashers at the green-building party. There is a strong relationship between sound old buildings and new green ones, so there is or ought to be a strong relationship between preservationists and green-building advocates." This presentation will discuss the perspective that advocates of historic preservation bring in discussions of green building, Climate Action Plans, ordinances, and sustainable development and provide practical applications to your jurisdiction.*
